

**SOME NEW RESULTS FOR GENERALIZED T -CONTRACTIONS IN
CONE s -GENERALIZED b -METRIC SPACE OVER BANACH ALGEBRA**

AZIZ AHMED, J.N. SALUNKE AND VESNA ŠEŠUM CAVIĆ

Communicated by Stojan Radenović

ABSTRACT. In this paper, the concept of cone s -generalized b -metric space over Banach algebra and generalized T -contractions are introduced as a generalization of cone b -metric space over Banach algebra and T -contractions respectively. Also a similar generalization for b -metric space is obtained. We give an affirmative answer to open problem posed by Z. Kadelburg, S. Radenović and L. Paunović [Gulf J. Math., **3**(2015), No. 3, 57-67], by proving fixed point theorems for generalized T -contractive mappings in such space. In addition some examples are given to illustrate that our generalization is a real generalization.
