COMMON FIXED POINTS IN RECTANGULAR b-METRIC SPACES USING $(E.A)$ PROPERTY

HASSEN AYDI, ABDELBASSET FELHI AND SLAH SAHMIM

Abstract. Very recently, Roshan et al. [18] introduce the concept of a rectangular b-metric and established some fixed point results. In this paper, using the concept of $(E.A)$ property, we prove several common fixed point results in rectangular b-metric spaces. We also derive some consequences and corollaries from our obtained results. Some examples are presented making effective the new concepts and results.
